Office Action Summary

Art Unit: 2872

1. Applicant's election of species "A", depicted by Fig. 2, in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 5-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species. Election was made without traverse in Paper No. 8.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method of a joining together a multiplicity of optical elements on a body, classified in class 359, subclass 350.
 - II. Claims 15-21, drawn to a faceted mirror for beam mixing and field lighting for a lighting system, classified in class 359, subclass 845.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other materially different product (i.e. a lens array or a product without reinforcements or cooling channels). In addition, that the product as claimed can be made by another and materially different process (i.e. a process depicted by Fig. 3 or a process without "galvanoplastic" techniques).

Art Unit: 2872

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Moreover, the search required for Group I would further require a search in class 359, subclass 900 and class 262, subclass 2.7 which would not be required for Group II and the search required for Group II would further require a search in class 362, subclass 346 which would not be required for Group I.

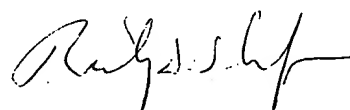

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R.D. Shafer whose telephone number is (703) 308-4813.
